Summary of calibration steps:

- Adjust zoom in Adobe Acrobat Reader (computer) / Xodo PDF Reader (mobile)
 - Move mat to keep it aligned with central squares and rectangles
- Adjust tilt of projector or mat/table and/or keystone settings to square up image
 - And only if needed, adjust aspect ratio options on projector and/or resolution on computer

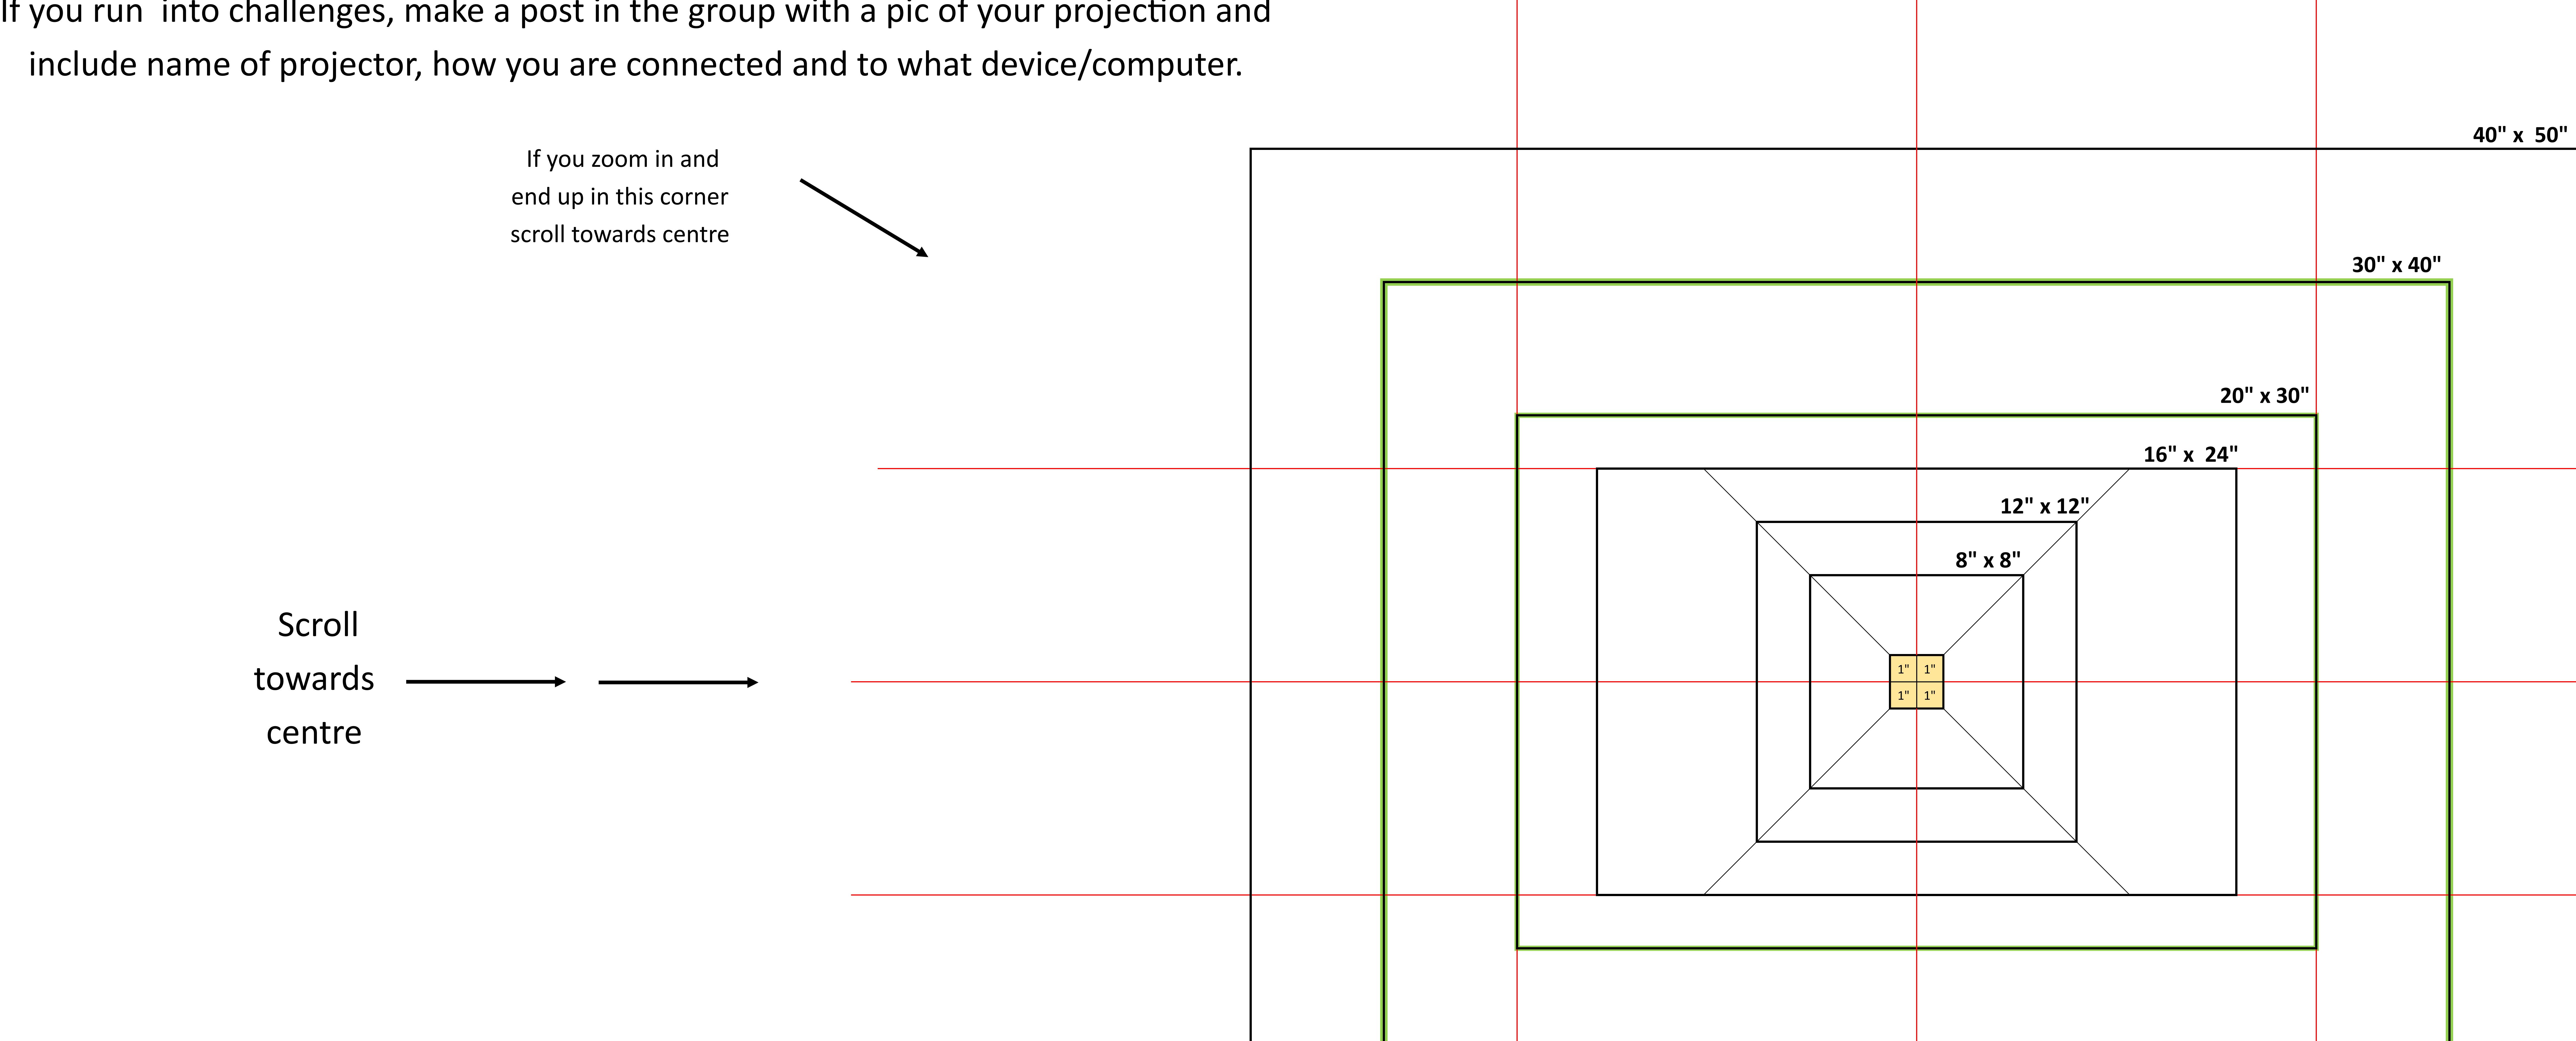

Goal is for labelled measurements visible on your projection to measure as accurately as possible

(does not have to be 100% accurate, we aim for about 99% accurate).

For more detailed steps, read Setup and Calibration guide in Announcements of:

www.facebook.com/groups/ProjectorsForSewing/

If you run into challenges, make a post in the group with a pic of your projection and
